

Women run down and endure daily tor tures through neg-Kidney backache makes housework a burden; rest is imossible; sleep fitful; appetite gives out and you are tired all the time. Can't be well until the kidneys are well. Use Doan's Kidney Pills,

which have restored thousands of suffering women to health and vigor. William Wallace, of 18 Capitol St., C.L.cord, N. H., says: "I was in the early stages of Bright's Disease,

and were it not for Donn's Kidney Pills, I would not be living to-day. Pain in he back was so intense that at night I nad to get out of bed until the paroxyam of pain passed away. I was languid and tired and hadn't the strength to lift a kettle of water. I could not work, but a few doses of Doan's Kidney Pills relieved me, and two boxes absolutely

A FREE TRIAL of this great kidney medicine which cured Mrs. Wallace will be mailed to any part of the United States. Address Foster-Milburn Co., Buffalo, N. Y. Sold by all dealers.

Skin Diseases, Bone Pains, Itchings, Aching Back, Blood Poison, Eczema,

The above pictures show what Botanic Blood Baim will do clearing the skin, healing all sores and cruptions, making the blood pure and rich We have confidence in Botanic Blood Baim [B.B.S.] and we send it free, all charges prepaid direct to any sufferer who will write us. We have cured with B.B.B. to stay cured, thousands of men and women, who suffered from all stages of impure blood, after every known remety, doctors, and specialists had failed. How to tell you have blood disease. If you have the tell-tale pimples or eruptions on any part of the body, rheumatte aches and pains in bones or foints, acthing back, swollen glands, or swellings and risings on the skin; blood feels into and watery, skin litches and burns, ezzema, scabby sores, mucous patches in the mouth, sore throat, scrofula, copper-colored spots hair on eyebrows falling out, bolls, carbuncles, rash on the skin, ulcers, weak kidneys: earling, festering sores; you may be certain you suffer from poison in the blood Get the poison out of your system by taking Botanic Blood Balm [B. B. B.] It is a purely and we send it free, all charges prepaid direct to any sufferer who will write us. We have cured with B.B.B

by taking Botanic Blood Baim [B, B, B,] It is a purely vegetable extract, thoroughly tested in hospital an private practice with over 5,000 cures made of the mos obstinate cases. Botanic Blood Baim [B,B,B,] health

private practice with over S.DJ cures made of the most obstinate cases. Botanic Blood Balm [B.B.B.] heals all sores, stops all aches and pains, reduces all swellings, makes blood pure and rich, completely changing the entire hody into a clean, healthy condition, Cancer Cured.

Botanic Blood Balm Cures Cancers of all Kinds, Suppurating Swellings, Eating Sores, Tumors, ugly Ulcers. It kills the Cancer Poison and heals the Sores or worst Cancer perfectly. If you have a presistent Pimple, Wart, Swellings, Shooting, Stinging Pains, take Blood Balm and they will disappear before they develop into Cancer. Many apparently hopeless cases of Cancer cured by taking Botanic Blood Balm [BBB.] Sold by all drugglists. \$1.00 per large bottle with complete directions for home cure.

For free sample write Blood Balm Co., Atlanta, Ga. Describe your trouble, and special free medical advice to suityour case also sent in sealed letter, Italready satisfied that B. B. B is what you need take a large hottle as directed on label, and when the right quantity is taken a cure is certain, sure and asting. If not cured your money will be refunded.

# I IKJI JIVII Of Torturing, Disfiguring

Humors Use

Every child born into the world with an inherited or early developed tendency to torturing, disfiguring humors of the Skin and Scalp, becomes an object of the most tender solicitude, not only because of its suffering, but because of the dreadful fear that the disfiguration is to be lifelong and mar its future happiness and prosperity. Hence it becomes the duty of mothers of such afflicted children to acquaint themselves with the best, the purest, and most effective treatment available, viz.: the CUTICURA Treatment, consisting of warm baths with CUTICURA Soap, and gentle anointings with CUTICURA Ointment, the great Skin Cure. Cures made in childhood are speedy, permanent and economical.

Just His Little Joke

There was a little group discussing the glorious news of Sampson's victory in an uptown saloon when a man walked in slowly and stood within earshot of the patriotic expressions. Finally he said in a rather mournful tone of voice: "Well, boys, you may talk as you please, but I would give my right arm to see the Spanish flag floating over New Orleans." There was a mad rush for the newcomer, and for some seconds the air was full of swinging arms. As the stranger ruefully regained his feet and pulled his battered remains together he attempted a smile that faded into a chastly grin, and he whined out: "You fellows are too quick. That's just my little joke. I'm blind."—N. O. Times-Democrat.

"I trust, Mr. Borum," said Miss Cutting, as the young man was about to depart, "that you will spend one more evening with us before we move into our new house."

"Delighted, I assure you, Miss Cut-ting," replied Borum. "By the way, when do you expect to move?"

"I'm not positive as to the exact she answered, "but the workmen began excavating for the cellar yesterday, and papa expects the house to be finished in about 18 months."-Chicago Evening News.

Oldest Town in Illinois.

The abandonment of the post office at Kaskaskia, Ill., for want of patronage, calls to mind the fact that this s the oldest town in the state, having been founded by La Salle in 1682-the same year in which Penn founded Philadelphia. It has remained distinctively French to this day, and the modern movement seems to have

Abetting Fate.

Jane-See here, hubby, why do you always carry a gun when you go out for an evening with the boys? You say a feller nin't going to die till his time comes!

Nevada Ned-Yes. But s'posen 1 neet a feller, and his time's come. Then's when I need a gun!-Puck.

World's Largest Tin Factory. The largest tin factory in the world is situated on Sulo Brani, an island in the bay of Singapore. It turns out monthly 1,200 tons of tin, more than the product of Cornwall and more than half that of Australia. The ore comes from Selangor and Perak in Malacea. -N. Y. Journal.

A Wide Margin.

First Politician-I hear some talk in administration circles about protecting the people of the Philippines from designing American politicians. Second Politician-What nonsense! We could give them better government than Spain ever did, and make

loads of money at that.-Puck. Rapid Work. Mrs. Gabley-See my new picture, dear. It was taken by the instantaneous process.

Gabley-I wondered how they caught you with your mouth closed .- N. Y.

Mrs. Nearby-I understand your

husband is ill. Is his condition critical? Mrs. Growell - Critical, indeed! Why, he is positively abusive .- Chicago Evening News.

#### WHAT THE KING EATS.

What's Fit for Him.

A Massachusetts lady who has been through the mill with the trials of the usual housekeeper and mother relates ar interesting incident that occurred no long ago. She says: "I can with all truthfulness say that

Grape-Nuts is the most beneficial of al cereal foods in my family, young as well as old. It is food and medicine both to us. A few mornings ago at breakfast my little boy said: " 'Mamma, does the king eat Grape

Nats very morning?"

"I smiled and told him I did not know but that I thought Grape-Nuts certainly, made a delicious dish, fit for a king. (It's a fact that the king of England and the German emperor both eat Grape-Nuts.)

"I find that by the constant use of Grape-Nuts not only as a morning cereal but also in puddings, sainds, etc., made after the delicious recipes found in the ittle book in each package it is proving to be a great nerve food for me, besides having completely cured a long standing case of indigestion." Name given by Postum Co., Battle Creek, Mich. There is no doubt Grape-Nuts is the

most scientific food in the world. Ten days trial of this proper food in place of improper food will show in steady, strong nerves, sharper brain and the power to "go" longer and further and accomplish more. There's a reason Look in each pkg, for the famous little book, "The Road to Wellville."

THE COTTON BOLL WEEVIL

Scientists Have Made Some Progress in Their Efforts to Exterminate the Pest.

The United States census report recently issued gives some startling figures as to the great damage done to the cotton industry in the last year through the ravages of the boll weevil. The report gives the total crop as 10,045,614 bales of a 500-pound standard. This is about \$00,000 bales less than produced last year. The total loss to the state of Texas up to date is about \$125,000,000. During the summer of 1894 planters

THE COTTON BOLL WEEVIL.

size of a common house fly. The states and the planters were at a loss to devise effective means to drive away the invader.

The department of agriculture came to the assistance of the planters, and sent special field agents from the division of entomology to make careful investigations of this enemy and invader and to devise plans for its extermination. Since then these scientists have waged relentless warfare upon the weevil, and made most exhaustive practical experiments to wipe out the insect. and have been partly successful. Recognizing the seriousness of this pest, congress has just appropriated \$250,000 to further aid in exterminating the weevil.

The adult weevil averages about onefourth of an inch in length, and has a beak about half the length of the body. It is of a grayish or reddish brown color. The insect exists in four stages-eggs, larvae, pupa and adult. All the stages except the last occur inside of the cotton square or boll. The egg is deposited by the female weevil in a cavity formed by eating into the fruit of the plant. It hatches, under normal conditions, in two or three days, and the grub immediately begins to feed.

In from seven to twelve days the larva or grub passes into the pupa, or quiet the silkworm. This stage lasts from three to five days. Then the adult weevil issues, and in about seven days begins the production of another generation. Climatic conditions cause considerable variation, but on an average it requires from two to three weeks for a weevil to develop from the egg to the

#### IN THUNDERSTORM SEASON

What Spots to Avoid in Order to Be Reasonably Safe from the Effects of Lightning.

son of thunderstorms is approaching people should understand what spots to avoid in order to reduce to the by lightning. Out-of-doors, trees should be avoided, and if from the ralows the flash it is evident that elecdom dangerous to take shelter under sheds, carts or low buildings, or under the arch of a bridge, and a distance of 20 or 30 feet from tall trees

a human being near the stream may properly ripened ensilage." determine the direction of a discharge the middle of a carpeted room, or account of the conducting power of the carbon deposited in it, and gill moldings or bell wires are sources of risk. In bed we are tolerably safe, since blankets and feathers are bad conductors. It is injudicious to take refuge in a cellar, because the discharge is often from the earth to a cloud, and the buildings frequently sustain the greatest injury in their basements."

Agriculture in the Schools.

The idea of teaching agriculture in primary schools is growing steadily, despite well-intentioned but really groundless opposition. The greates stumbling block has been ignorance of teachers concerning scientific agri culture. There is now little excuse for any teacher remaining ignorant of z few of the general principles of crop production. Anyone if he makes up his mind can fit himself for teaching how to prepare soll for planting and cultivate a few of our leading farm crops. Agricultural papers, agricultural books, nature study, literature are within the reach of every teacher. Of course consolidation of schools will render the teaching of agriculture comparatively easy. until this is accomplished much can be done.-American Agriculturist.

Refuse Meat for Poultry.

for inducing hens to lay, but meat should not be fed in excess. The refuse from factories, known as chandlers scraps, comes in pressed cakes. It is expound a day to 20 hens. If fed in larger amounts, to the exclusion of other foods it will cause the hens to become overfat as it contains quite an amount of carbonaceous material that escapes the heavy pressure required to extract the grease it should be used only as an assistant with the regular supply of grain.-Farm and Fireside.

#### INCREASING THE PROFITS.

It Can Be Done by Giving the Hogs More Range and Free Access to Pastures.

A very common practice, and yet a

is to confine their swine in close nens. not allowing them free range and a change of atmosphere. The original hog had the freedom of the woods, where he could dig for roots and obtain other things possessing medicinal qualities; consequently he was much healthier, and less liable to cholera and other contagious diseases. All animals like a change of dist. This they can get when allowed a large pasture to roam over, as there will be found there so many kinds of weeds that they will relish, which will greatly improve the appetite. Notice the difference betweeen two bunches of hogs; one which has been closely confined, the other which has had plenty of range and change of sleeping apalong the Rio Grande and southwestern partments. You will readily notice Texas discovered in their cotton fields the difference in appearance, health, the presence of a small, grayish, longgrowth, etc. Another very poor practice is to allow hogs to sleep on piles of manure, or around old straw stacks, and when allowed to do this, ere long the hogs will show the effects of such a poor practice—as some will show signs of poor health and also stunted condition from over heating and over laying. Grain being more costly than the grasses it is therefore a point in growth, etc. Another very poor practhe grasses it is therefore a point in economy to gain as many pounds as possible by the use of grass. It has been well said that "variety is the spice of life." This is as true of the life of animals .s of man. Don't feed those pigs so much grain, give them such food as will be conductive of more growth and less fiesh. Prepare a pasture especially adapted to the needs and wants of the pigs, such as clover, peas, rape, etc., and you will have stronger and better hogs. Hogs weighing about 200 pounds, well fattened, are bringing the top of the mar.

Good News from Texas.

New Braunfels, Texas, May 23rd.—A remedy has been found which cares every form of Kidney Trouble from Bright's Discase down, including Rheumatism or Heart Town Braunfels has used it in his family and says of the result: "My wife had a heap of trouble with Kidney and Heart Disease. She was very bad and nothing seemed to help her, till we tried Dodd's Kidney Pills, and the first box of this medicine did her more good than all the other pills and medicine she had used. We are very thankful to Dodd's Kidney Pills for what they have done for her." ket now. The large coarse hog is no longer in such demand; this works a great saving to the producers, as it is possible to make market toppers in six to nine months, so that it is not to the producers. Bodd's Kidney Pills for what they have done for her."

Many other cases are being reported, in which this remedy has done wonderful work in the relief and cure of Rheumatism, Diabetes and Kidney troubles of all kinds. sary to winter anything but the brood sows; spring pigs being marketed in the fall. In this way, too, they can be matured at much less cost than those that have to be wintered before fat tening. Think it a better plan to give even those hogs that are on full feed a chance to roam some, as they will

#### ENSILAGE FOR DAIRY COWS.

One Cubic Foot of Silo Space Should Be Provided for Each Animal Per Day.

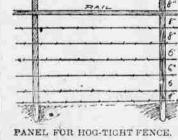

There is no longer any question about the value of the silo and silage stage, corresponding to the cocoon of for dairy cows. The testimony in behalf of this is unanimous, and very conclusive where silage is fed to the cows. Here are some practical references to the construction of the sile and quantity of the silage, by Prof. Thomas F. Funt, of the Ohlo State University and Agricultural College: "One cubic foot of silo space should

be provided for each cow per day. To obtain the size of silo required multiply the number of cows to be fed by the number of days it is desired to feed ensilage and the result will be the cubic contents of the silo required. Silos should never be less than 20 feet deep, and 30 feet is very much better. The The Philadelphia Ledger gives this ensilage should always be fed off the excellent advice: "Now that te sea- top, keeping not more than eight square feet of surface for each cow fed and five square feet is better. It is sometimes more economical to get this minimum the chances of being struck relationship by increasing the size of the herd than by reducing the size of the silo. The amount of weight by enpidity with which the explosion fol- sitage that a silo will hold depends upon several factors, as the size and tric clouds are near at hand, a recumbent posture is the safest. It is selection of the safest and the ripeness of the bent posture is the safest. It is selection to the safe and the safe of pounds of ensilage a silo will hold can be determined by multiplying the cubic contents of the silo by 30. A ton of ensilage will thus fill 66 cubic or houses is an eligible situation, for feet. The number of tons of ensilage should a discharge take place these which can be grown per acre is a matelevated bodies are most likely to re- ter upon which there is much difference of opinion. My experience leads "It is well also to avoid water, for it me to believe that 12 tons of ensilage is a good conductor, and the height of per acre is a fair average yield of

#### Within doors we are tolerably safe in A HOG-TIGHT WIRE FENCE.

when standing on a thick hearth rug
The chimney should be avoided on Cattle Are Not Apt to Cattle Are Not Apt to Run Into It.

> hogs is shown in the accompanying illustration and is self-explanatory. The

rail or scantling near the top is used for two purposes. Horses and cattle can see it easily and are not apt to be damaged by running into the fence. It serves as a brace and the wires are more easily kept taut than when it is omitted a most important item in a hog fence made of barbed wire.-- Grange Judd

Live Stock in the Orchard. Now and then we see the advice gives to pasture the stock in the orchards. But if the orchard is a modern one, we loubt very much if the advice is good Meat will be found equal to any foot It might have been all right in the oldfashioned orchard that had trees head ed high, and of which the stock could not eat the lower branches or gather the fruit from them. But in some of our bes cellent when fed moderately-about a orchards the trees are headed so low that the branches almost lie on the ground, and in the growing season a very large amount of fruit would be within the reach of the stock whatever kind it might be. Poultry is about the only class of farm stock that can be given access to the orchard without running great chances of extensive injury resulting .- Farmers' Review.

#### COULD HEAR IN GERMAN.

A Horse That Was Not Used to Instructions in Any Other Language.

"I bought a horse at an auction not long ago, said an Eighth avenue butcher, secording to the New York Press, "and I thought I had got a bargain until I tried him a few days, then I concluded that I had been stuck. The horse was sound, had good sight, but he would not obey commands. He would not stop when the driver said 'Whoa!' nor start when he said 'Git up!' The animal seemed to be deaf, and the first chance I got I sold him to s. very injurious practice, among farmers 'Git up!' The animal seemed to be deaf, and the first chance I got I sold him to a

and the first chance I got I sold him to a German baker at a sacrifice.

"Shortly after that I met the baker, and he shook my hand cordially and expressed himself as being very much pleased with the borse I had sold him. I wondered at this and asked if the horse seemed to have any difficulty in hearing. To my surprise, the baker said the norse could hear as well as any horse he ever had.

"Does he stop when you say "Whoa!" and start when you say "Git up?" I asked.

"Ob, no!' exclaimed the baker, 'I don't say dot! I talks to him in German!'
"That horse must have belonged to a German before he was put up at auction. That is the only way I can account for his actions."

Congressional Pleasantries.

Good News from Texas.

This will be good news to many who are suffering as Mrs. Schumann was before Dodd's Kidney Pills cured her.

History's Hilarity.

Hisworths and his prospective father-in-law were sitting before the latter's tepec. "I was looking for flints for arrow-heads over the ridge to-day," remarked the young brave, "and found several quartz." a chance to roam some, as they will not to do this if water is handy to the feed pen.—Agricultural Epitomist.

"I must tell that to my daughter," the arrowmaker chuckled. "It will make Minnehala."—Detroit News.

Overheard on the Pike. Mr. Easy—"Why should people visiting The Exposition at night, use more Allen's Foot-Ease than in daytime?" Miss Foote—"Because under the brilliant illumination of the grounds, every foot

becomes an acre!"
Mr. Easy—"Fair, Only fair! Pray, cor duct me to the nearest drug store 2 id I promise never to accept a substitute for you or for Allen's Foot-Ease."

FOOT NOTE—The twain will be made one in June.

Having a Pic-nic.

Having a Pic-nic.

There is something particularly enjoyable about going to a picuic. The very word Pic-Nic brings pleasant anticipations of a good time. The idea of going out to the woods and fields or down by some brook or lake, with luncheon to be served on the grass and under the trees, has a peculiar inscination. The fresh air and exercise contribute to give a hearty appetite to all and everything at luncheon seems far better than the finest course dinner that a French chef ever served. Wooden dishes supplant Dresden china, and paper boxes silver

Dresden china, and paper boxes supplant Dresden china, and paper boxes silver trays, when the "good things to eat" are spread upon the ground.

Pic-Nics are never complete without the sandwiches, sweet white bread with a generous layer of meat between. Libby's canned meats are ideal for pic-nics and outings. The cans are so easily opened, and the contents so fresh and palatable, that no pic-nic is a success without Libby's "Natural Flavor" Food Products.

The Japanese treat their servants as they do other members of their households, and everything is serene. The greatness of the Japanese will not depend upon the way they battle with Russiathey have solved the servant problem.—Philadelphia Ledger. Don't Get Footsore! Get Foot-Ease.

## U. S. SENATOR FROM SOUTH CAROLINA

Recommends Pe-ru-na

For Dyspepsia and Stomach Trouble.

Ex-Sénator M. C. Butler.

......

If you do not derive prompt and satis-

factory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case, and he will

vice gratis.

Catarrh of the Stomach is Generally Called Dyspepsia --- Something to Produce Artificial Digestion is Generally Taken.

Hence, Pepsin, Pancreatin and a Host of other Digestive Remedies Have Been Invented.

These Remedies Do Not Reach the Seat of the Difficulty, Which is Really Catarrh.

EX. U. S. Senator M. C. Butler from South Carolina, was Senator from that state for two terms. In a recent letter to The Peruna Mediane Co., from Washington, D. C., says:

"Ican recommend Peruna for dyspepsia and stomach trouble. I have been using your medicine for a short period and I feel very much relieved, It is indeed a wonderful medicine besides a good tonic." --- M. C. Butler.

The only rational way to cure dyspep-sia is to remove the catarrh. Peruna cures catarrh. Peruna does not produce artificial digestion. It cures catarrh and leaves the stomach to perform direction in a natural way. This is vastly better and safer than resorting to artificial methods or narcotics.

Peruna has cured more cases of dys-pepsia than all other remedies combined, simply because it cures cutarrh wherever located. If catarrh is located in the head, Peruna cures it. If catarrh has fastened itself in the throat or bronchial tubes, Peruna cures it. When catarrh becomes settled in the stomach. Peruna cures it, as well in this location as in any other.

be pleased to give you his valuable ad-Peruna is not simply a remedy for dyspepsia. Peruna is a catarrh remedy.

Address Dr. Hartman, President of Peruna cures dyspepsia because it is The Hartman Sanitarium, Columbus, O. | generally dependent upon catarrh.
